

Manage. Protect. Create value.

A Swiss digital ecosystem
for parking management.

Generated P+R illustration; it does not depict a client site.

**One company.
Solutions for different needs.**

Unauthorised parking, permits, paid parking, municipal tools and rural stopovers.

PMETool Sàrl, established in 2011

Partners · Operators · Institutional clients

01 / THE COMPANY

PMETool: experience beyond parking.

A Swiss company based in Les Ponts-de-Martel, in the canton of Neuchâtel.

15 years

of PMETool Sàrl in 2026

Established in 2011 · Business software since 2008

Proven software expertise

Since its foundation, PMETool has developed and maintained business software in Switzerland and internationally.

More than 3,000 users

Invoicing solutions used by professionals in several French-speaking countries.

Canal+ Suisse reference

Development of bespoke bulk invoicing software to meet specific business requirements.

This experience underpins PMETool's current work in parking management and related services.

DEVELOPMENT OF THE PARKING BUSINESS

2024

An initial client solution

A specific client requirement marks the start of the parking business.

THEN

PlacePrivée.ch: a service for private users

The solution opens to private users, with coverage including an ArcInfo article.

LATER

Security Parking: B2B development

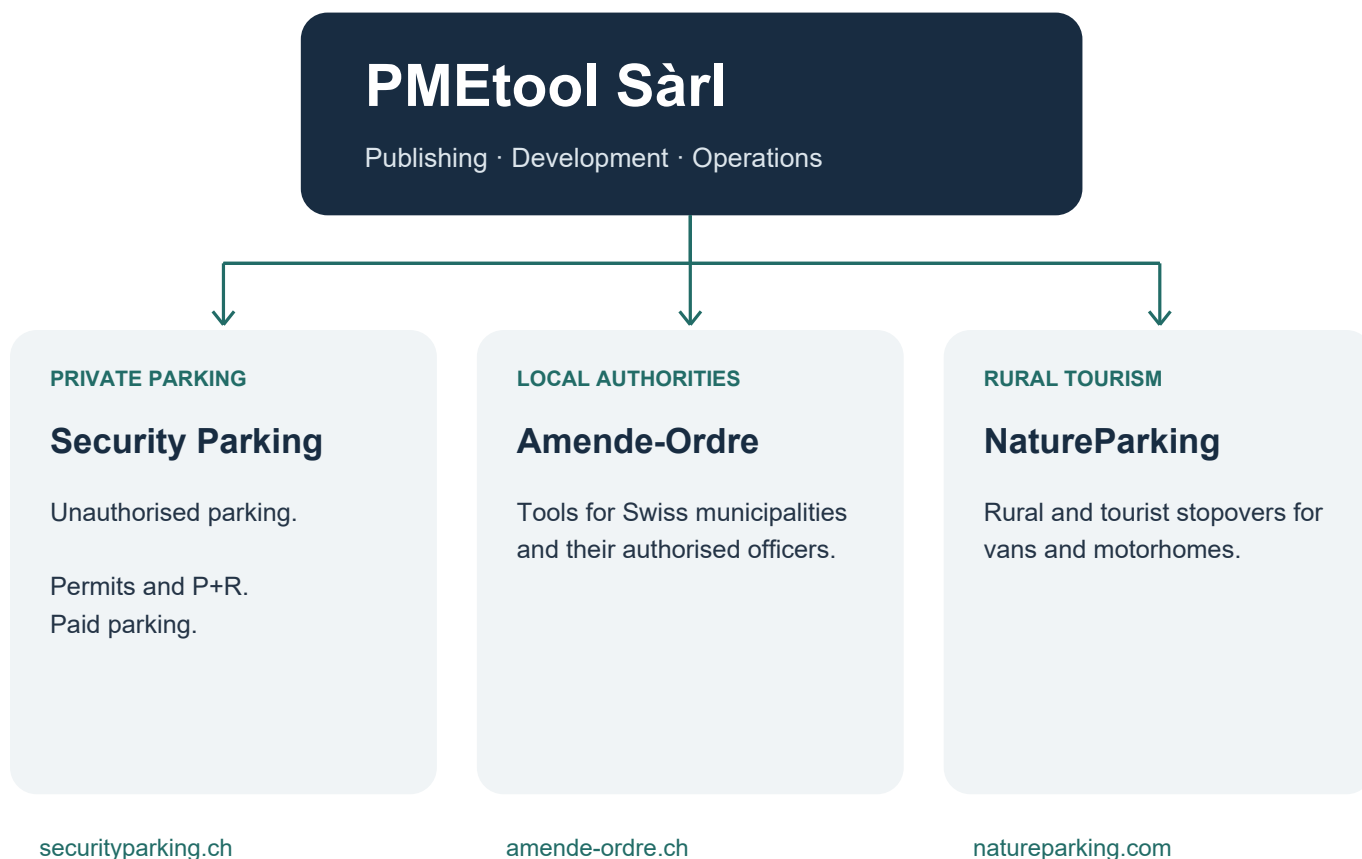

PlacePrivée joins Security Parking: a shared technology platform for different parking management needs.

pmetool.com

[Read the ArcInfo article about PlacePrivée](#)

One company. Solutions for every use case.

A functional map of activities and websites: the services presented are part of PMEtool Sàrl.

PlacePrivée.ch

An information site guiding private parking owners and users to Security Parking.

placeprivee.ch

Shared expertise

Mobile workflows · Access rights · Payments · Administration
Interfaces and procedures tailored to each audience.

03 / SECURITY PARKING

Protect the use of private parking.

An operational platform to document and process unauthorised parking.

SIX BENEFITS FOR YOUR PARKING SITE

Your teams stay in control. The platform organises evidence and case processing.

01

Warning or compensation claim

Start with a warning without a payment demand or request compensation. Adapt the notice and process to the site.

02

No subscription or fixed fees

The standard service has no fixed fees. Occasional use is possible without an account; checks by your teams reduce reliance on external monitoring.

03

Up to 75% paid back

With a validated account and a signed mandate, a share of the base compensation actually collected is paid back under the agreed terms.

04

A complete digital record

Up to four photos, assisted number plate reading, geolocation and timestamps: a complete case record saved online from a phone.

05

Case tracking in four languages

With an account: case status, payments and statements. Core workflows in French, German, Italian and English; drivers can also view their case.

06

A human point of contact

Partners and drivers can reach us by form, email and phone. Enquiries and disputes receive personal attention.

An integrated process: record · process · collect · pay back.

[Discover the benefits of Security Parking](#)

A mobile workflow, from user to inspection.

Working demonstration available on request: temporary parking rights, supporting documents and plate-based subscriptions.

The image displays three sequential mobile app screens for a parking permit system.

- Screen 1 (Left):** Shows the user's location as "P+R Site A - Gare" and a "DEMO01" button. It prompts the user to "Annoncez votre stationnement" (Announce your parking) by adding a photo or PDF of a justification. A progress bar indicates three steps: 1. Ajouter (Add), 2. Identifier (Identify), and 3. Valider (Validate). The "Ajouter un justificatif" (Add justification) section is active, showing options to "Prendre une photo" (Take a photo) or use the "Galerie ou PDF" (Gallery or PDF).
- Screen 2 (Middle):** Titled "ÉTAPE 1 Ajouter un justificatif", it shows a sample PDF document "sample-document.pdf" (1 Ko) that has been added. It prompts the user to enter the "Numéro d'immatriculation" (Registration number), with an example "Ex. VD 123456". There is also an option to "Ajouter une note au gestionnaire" (Add a note to the manager) and a "Reçu par e-mail" (Receipt by email) section with a placeholder "nom@example.ch". A "Valider l'enregistrement" (Validate registration) button is at the bottom.
- Screen 3 (Right):** Displays the receipt details in a table-like format:

PLAQUE	VD 123 456
ENREGISTRÉ LE	29 oct. 2026, 11:12
VALABLE JUSQU'AU	30 oct. 2026, 11:12
CALCUL DE VALIDITÉ	24 heures depuis l'enregistrement
DOCUMENT	PDF ajouté
STATUT	À contrôler

 Below the table is a "Télécharger le reçu" (Download receipt) button and a link to "Effectuer un nouvel enregistrement" (Perform a new registration). A note at the bottom states: "Démonstration : aucune donnée n'est transmise ou conservée sur un serveur." (Demonstration: no data is transmitted or stored on a server).

1. Add a journey and supporting document

2. Identify the vehicle

3. Confirm and view the receipt

Parking rights that can be checked on site

Users register via the parking site's QR code. Inspectors check parking rights; supervisors view their assigned scope. Checks by on-site teams can reduce external services and their associated fixed costs.

Anonymised screenshots of the French-language P+R prototype; fictional sites and data. Production connections remain to be completed for each project.

05 / PAID PARKING

Managing paid parking.

Monetise mixed-use or dedicated parking and retain an on-site overview, in line with the operator's policy.

01

Scan

The QR code identifies the parking site.

02

Choose

Number plate, period and applicable options.

03

Pay

Online payment at the applicable rate.

04

Check

Check parking rights on site.

OPERATOR VIEW

The information needed to make on-site decisions.

Occupancy and parking rights

Free or occupied spaces, authorised plates and paid parking end times.

Bookings and checks

Upcoming bookings and access to the compensation claim workflow.

Separate financial view

Payments, statuses and receipts, separate from on-site operations.

Workflows developed; live payments must be validated before the relevant service goes into operation.

06 / DISTINCT AUDIENCES

The right tool, in the right framework.

Solutions for related needs, with procedures and responsibilities specific to each use.

SWISS MUNICIPALITIES

Amende-Ordre.ch

A solution for municipalities and authorised officers to manage fixed penalties: mobile entry, photos, cases and administration based on access rights.

FUNCTIONAL PRESENTATION AVAILABLE

amende-ordre.ch

Inform and guide

PlacePrivée helps users understand private parking issues and guides them to the Security Parking platform developed by PMEtool.

placeprivee.ch

An essential distinction

Private Security Parking cases and municipal fixed penalties follow distinct frameworks. Interfaces and procedures are adapted accordingly.

Create value from rural and tourist pitches.

Project under development - launch planned for March 2027.

NatureParking project illustration; it does not depict a partner location.

NatureParking

Connect van and motorhome travellers with farmers and landowners offering countryside stopovers.

For hosts

Present the location, services, availability and conditions of stay.

For travellers

Browse pitches, book and pay through the planned workflow.

natureparking.com

From the site's needs to the right workflow.

Two examples illustrate the scope of the service without disclosing confidential commercial information.

OPERATIONAL SERVICE

A private harbour on Lake Geneva

80 parking spaces. Two harbour employees record cases with Security Parking, replacing outsourced checks.

In-house checks save the fixed costs of an external monitoring service. Net savings remain to be measured over time.

09 / PARTNERSHIPS

Build useful complementary services.

A practical starting point: your parking site, teams, rules and existing systems.

01 Technology integration

Connect permit, parking management or mobility systems to simplify checks and the processing of unauthorised parking.

02 Operational collaboration

Adapt workflows to operators' teams and inspectors, based on their responsibilities and assigned scope.

03 Commercial cooperation

Explore a focused pilot, distribution, a joint offer or mutual client referrals within a clear contractual framework.

Let's discuss your use case.
